

space explorers

exploring architecture through the arts

FREE CPD course in September 2007

This course is for Key Stage 2, 3 & 4 teachers who are interested in developing a new focus for an arts-based project in school and who would like to learn more about creative and innovative ways of exploring architecture, a free resource at everyone's fingertips and on everybody's doorstep.

During the day, there will be the opportunity to sign up to take part in the **space explorers challenge**, a region-wide pilot project aimed at encouraging children and young people to question and investigate their local built environment through the arts.

Northern Architecture is currently working to secure funding to provide participating schools with the support of artists and architects during the pilot phase of this scheme and to hold an exhibition at the end of the project to celebrate the work produced.

If you are interested in taking part in the initial CPD course, please fill in the 'Expression of Interest' form and return to Sarah Allen no later than 8 June 2007, after which the precise date and venue for the course will be confirmed:
